If there are any further incidents I will let you know.

Thanks,
Jeremy

A few issues with Jesse saying Grant is always disappearing when there is work to be done and Grant has not brought anything to my attention about Jesse until just now.

Have you spoken to Jesse yet? Has there been any other issues between them in the past?

Grant and Jesse are having a little dispute. Jesse and Gene were on break while Andrew was sweeping the warehouse. I went out into the warehouse and did not see Grant all I seen was Andrew sweeping. I called Grant and he was using the restroom. I told him as soon as he was done Andrew needed help. Then I went to the plant to do a couple inventories. I got a text from Grant at 6:27Pm saying "come over Jesse needs to talk to you about me before things escalate".

So I ended up coming back over to the DC at around 7:10PM and Jesse and Gene were working and Grant was assisting Scott in backing in a trailer at the plant. When Grant was done I went out to the podium were he was working and asked what was going on. Grant told me I should take Jesse into the office and see what his problem with him was.

Yes I spoke with Gene, Jesse, and Grant down at the end of the shift and told them from now on if you are not on break or using the rest room, you should be working. If there is anyone disappearing I will start issuing warnings. I also stated cell phone use during work hours is not allowed and will have the same consequences.
