WORK EXPERIENCE

Job Floater/Grinder

EPOCS Manufacturing - Longmont, CO - 2017-03 - 2017-11

As a lead Grinder, I managed to move up from helper to lead in a matter of five months. On the Job, we grinded, sculpted, and sanded, on average of 10 bumpers a day with a crew of four. Along with other sheet metal cosmetic customer parts. I have experience with 2 inch, 4 inch, and 7 inch grinders. A 5 inch DA sander. Along with other tools. When there wasn't work in Grinding. I was also switched over to different departments. Through that, I acquired experience in different fields. From powder coat and machining, to assembly/hardware and shipping. I gathered a significant amount of experience from my second time here.
