Work Experience

Crew Member/Cashier

McDonald's-Fort Collins, CO

2017 to Present

When I was first hired my position was upfront cashier and I was gradually acquainted with a majority of the other positions such as front window which was handling soft drinks, Ice cream cones and frappes, iced and hot coffee and handing out food. Also French fries putting them down and salting them and prepping them for orders. Bagging food which is a lot more memory then anything else, I've grown to be in backlash usually which is taking both lanes over headset and taking cash. The store thrives to hit 2:00 minute order times so it's really fast paced, but I've been there for a long time and I enjoy being productive. In the first 7 months one of my managers gave me a positive reference because I caught on quickly. The reason I am leaving is because I live in Loveland now and have been riding multiple busses up to Fort Collins to work through the pandemic.

McDonalds Crew Trainer

The company I worked for was owned by Tod&Amyinc. A McDonald's located at the corner of Willox and Collage in North Fort Collins

Education

None
