WORK EXPERIENCE

machine operator/ shipping & receiving

Lear corporation - Taylor, MI - October 2012 to January 2014

Responsibilities

I operated, maintained, and maintained plastic molding injection presses, making parts such as junction boxes, & fuse boxes etc for major auto companies like Ford, GM, Chrysler, Volkswagen etc. I spent the last 6 months there doing shipping & receiving. Where I obtained my industrial truck (hi-lo) license.

Accomplishments

I assured quality and production. I spent the last 6 months there doing shipping & receiving. Where I obtained my industrial truck (hi-lo) license.

Skills Used

I demonstrated my maintenance skills and furthered my ability to be mechanically inclined

operations support technician

BASF corporation - Wyandotte, MI - February 2009 to October 2012

Responsibilities

I operated a pre polymer silicon like mold line doing hourly quality and weight checks. I did my own maintenance. While on the line.

Accomplishments

I utilized my skills of using tools, working on industrial machines such as molds and pumps etc. I was also a member of the Sites Unit Safety Team.

Skills Used

I utilized and furthered my ability to be mechanically inclined.

industrial painter/ General labor

materials processing - Riverview, MI - February 2007 to January 2009

Responsibilities

I was responsible for inspections and touch up painting for various metal auto parts. I also was a back up industrial painter where I painted the rust proof fire resistant coating over gas tanks

Accomplishments

This was the stepping stone of my ability to be diligent and good with using tools.

Skills Used

I learned how to be a team worker and take on deadlines that needed to make stuff happen on time

EDUCATION

high school graduate - Southgate, MI
