## Work Experience

---

### **Production Operator**

Niagra Bottling, LLC - Aurora, CO

September 2019 to March 2020

- Responsible for daily activities of the production line(s), ensuring product adheres to Niagara's standard of safety, quality, and throughput.
- Accurately completes applicable quality and production reports hourly. Physical and visual inspection of product is required to prevent non-conforming goods. Correctly reports all quality defects to the appropriate team members and shift leadership.
- Adheres to the highest standards of company and plant safety programs, guidelines, rules, and regulations.
- Abides by Niagara's Good Manufacturing Practices (GMP) and Food Safety Standards at all times.
- Maintains general housekeeping in all areas of production and additional areas assigned by plant leadership.
- Maintains appropriate level of raw materials as required, to ensure production lines incur minimal downtime.
- Demonstrates the aptitude and skill to work in all assigned areas of production; troubleshoots minor production line issues and performs relief duties when required.

### **Machine Operator**

Brite-Line Technologies, LLC - Denver, CO

August 2011 to July 2019

Machine operator

- Read and interpret blueprints, diagrams and drawings to input data into the equipment accordingly.
- Calibrate machinery regularly to maintain efficiency and productivity standards.
- Monitor the operation of equipment to detect any defects or problems.
- Adhere to standard safety standards and norms to ensure proper usage of equipment that maximizes machinery lifetime.
- Determining, loading and adjusting production rates to keep up with the demands for manufactured goods.
- Carrying out proper data collection and report-making about all the operations being carried out by machinery.
- Feed raw materials into equipment to move the production process forward.
- Follow specified measurement norms and accordingly adjust the measurements whenever required to maintain the acceptable standard of the final product.
