OBJECTIVE

Enthusiastic scientist often praised for interpersonal skills, looking to move from scientist into a role of talent acquisition.

SKILLS

- Highly involved member of scores of interview committees for a successful company that has grown from 50 to 500 employees in 5 years.
- Selected as one of 5 scientific members of an intense sales force recruiting effort for 200 new employees
- Highly personable
- Enthusiastic about placing the right people in the right position
- Excellent planning and execution skills
- Thrives in a multitasking, fast paced, competitive landscape
- Working knowledge of Microsoft products, Apple products, Internet resources

PROFESSIONAL EXPERIENCE

Ironwood Pharmaceuticals, Cambridge, MA	5/2007-current
Senior Associate Scientist I (promotion)	12/2011-current
Associate Scientist II (promotion)	5/2010-12/2011
Associate Scientist I	5/2007-5/2010

- In-depth contributing member of Medicinal Chemistry, both scientifically and non-scientifically.
- Easily able to move across projects due to my ability to adapt, learn, and deliver efficiently.
- Responsible for numerous non-scientific roles in the group of 20
 - Generating group annual multi-million dollar budget
 - Planning and executing group weekly meeting
 - Situating new scientist
 - Liaison for group with numerous other functions of the company.
 - Member of Research overhaul team member, hiring committee, community outreach
- Independently generates compounds for SAR design through design, research, multistep-syntheses, purification and characterization.
- Ironwood has taught me to always do what is needed for the better of the company.

Infinity Pharmaceuticals, Cambridge, MA	9/2006-3//2007
Contractor Aerotek Scientific	

Member of BCL2 team collaborating with Novartis
Bench-top wet chemistry, large-scale synthesis, LCMS, NMR, flash chromatography.

ArQule Inc., Woburn, MA	2003-2006
Scientist II	2005-2006
Scientist I	2004-2005
Associate Scientist	2003-2004

Worked as an organic chemist for ArQule's outside collaborator developing and optimizing chemistry for libraries using parallel synthesis.

Responsible for equipment maintenance for chemistry department consisting of: maintaining HPLC, Genevac, OCS, LLE, WAD, solvent availability and compliance.

Presented project chemistry techniques and updates to colleagues interdepartmentally, companywide, and outside collaborators.

Selected as a member of a company wide cross-functional communications team identifying and resolving process obstacles utilizing my problem-solving and interaction capabilities.

Worked independently and with Group leader on publication.

Bayer Healthcare, Diagnostics Division, Walpole, MA	2002-2003
Laboratory Technician I	

Worked in a clean room as a laboratory technician creating and in process testing, controls, calibrators, and standards used for human diagnostic purposes.

Maintained laboratory inventory accurately to minimize inventory cash loss.

Ensured laboratory cleanliness to meet specified microbiology requirements.

Created many oncology and infectious disease testing kits including CA125, HIV, Hepatitis, PSA, TSA, CA15-3 to be sold in the US and abroad.

Responsible for the production of tests through several steps of production including:

- Preparation/Manufacturing
- In-process testing
- Lyophilizing
- QC follow-up
- Release

EDUCATION

Salem State College, Salem Massachusetts, B.S. Chemistry 2002
