Quality Control Inspector

Objective

Seeking a Quality Control position in the Aerospace Chemical Processing sector. I have eight years of experience in the quality control industry and I am currently performing all Polymer testing for Quantum Technologies to approve all of the company's manufactured material as well as performing product quality audits and inspections of all parts, finished goods, manufacturing output and in-process manufacturing activities. After completing these activities I update all associated logs and input all associated files. I also work within the internal functional areas measuring and maintaining the quality performance of the team while communicating all issues and concerns to best assist in resolving any issues to help achieve all of the projected objectives. I believe I would be a great asset to your company with the knowledge and experience I have accumulated over my previous positions and education. I am a dedicated and hard worker who is punctual and focused. I am an ambitious, enthusiastic leader with a desire to guide teams in achieving established goals and in producing exceptional production rates. I lead with balance and structure. I have a firm grasp on complex requests and will guide operations to optimize day-to-day activities while minimizing the costs. My goal is to ensure that the team's process and production always delivers products of maximum quality in a profitable manner.

Work Experience

Quantum Fuel Systems (LAke Forest, CA) (November 2022 - Current)

- Pressure Vessel Inspection
- Multiple-Element Gas Container Inspection
- Manifold Framework Inspection

Nihon Kohden (Irvine, CA) (irvine, CA) (April 2022 -November 2022)

- Receiving Inspection
- Device calibration (Defibrillators and Heart Monitors)

Ryan Jones Construction (Cabazon, CA) *April 2020 - March 2022*)

- Journeyman Housing Inspector
- Overseeing the Construction and Rebuilding of Houses and Housing Complexes into custom luxury homes and Apartments across Orange and Riverside County.

All Metals Processing (Stanton, CA) *December 2017 - April 2020*

- Lead Inspector
- Managing day to day procedures as the Lead while working side by side with directors and engineers to achieve and exceed the quality and production rates.
- Oversee product quality control and specifications. Review purchase orders and see that they are on time and fulfilled correctly.

Sierra International Machinery (Southern California Branch, CA) *June 2013 - January 2020*

- Perform Part-Time Seasonal Maintenance

Danvo Machining Company (Santa Ana, CA) *November 2016 - December 2017*

- Shipping and Receiving Assistant Manager
- Production and Processing Inspection, Machining, Shipping and Receiving, Product Identification, Customer Service Representative and company driver.

Skills/Qualifications

- Experienced in and have the ability to train others in;
- Precision Manufacturing and Chemical Processing Quality Control
- Pressure Vessel Inspection
- Roto-Mold Inspection
- Anodize Inspection
- Plating Inspection
- Paints, Lubricants, Powder Coat and Teflon inspection
- Chemical Evaluation
- SAP & JDE proficient
- Chromatics/Color Analysis
- Microsoft Office Computer Skills
- Plotting / CAD Design
- Microsoft Office Computer Skills
- Chromatics/Color Analysis
- Calibration and the use of Precision Measuring Devices; Micrometers, Calipers, Height Gauges, Air Gages, Pin Gauges etc.
- Material/Alloy
- Educated and Proficient with ISO 9001 & AS 9100 Standards
- DOT Inspection
- ABS Inspection
- CMM Inspection
- Heat and high humidity chamber Testing and inspection
- LN2 (liquid nitrogen cold chamber testing)
- TTSM (Tensile Testing)
- Hermetic Pan Preparation
- (DSC) Differential Scanning Calorimeter
- Good Written and Verbal
- Excellent Problem Solving and Analytics
- Self- motivated/ Results Driven
- Inside/Outside Sales
- Acute Organizational Skills
- Strong Interpersonal and Communication Skills
- Customer Retention and Engagement Strategies

Education

- High School Diploma 2012
- College: Orange Coast College 2015-2017. (My studies were focused on Chemical and Genetic Biology)
