Objective

Experienced and motivated individual seeks employment in a manufacturing or construction setting. I am searching for a job that rewards a good work ethic with opportunities to grow as an employee.

Experience

US Navy, Groton, CT

07/2003 to 08/2007

As a Nuclear-Qualified Machinist Mate, my general duties were to operate and maintain the nuclear steam plant of a US Navy Fast-Attack Submarine. More specific duties included preparing training material, creating maintenance procedures, and standing various watch-stations onboard the USS Alexandria (SSN 757). All duties were performed while also adhering US military rules and regulations.

LM Windpower, Grand Forks, ND

09/2007-11/2012

My general duties as a wind turbine blade technician were to inspect and repair fiberglass wind turbine blades. More specifically my duties included documenting various types of blade damage, repairing them in accordance with work instructions, and performing finishing work on the blades. I also was my company's representative on several construction projects and would report technical aspects of repairs to our customers. While working around the country with little direct supervision I was responsible for financial reporting and logistics of supplies to my various job sites.

Education

University of North Dakota

08/2010-11/2011

B.S. Electrical Engineering with electrical generation focus
