## Work Experience

---

### **Warehouse Worker/Forklift Operator**

White Castle System, Inc.

June 2016 to September 2018

Everyday I operated a forklift and walk behind pallet jack, in a cooler or a giant freezer. Majority of the work was putting together orders for certain stores, wrapping their pallets, labeling, and putting them away for the next day's deliveries. About 2-3 times a week we unloaded various kinds of trucks, put away pallets of all different weights, and stacked pallets to save room (mostly on buns, which were very light). We were also assigned to take inventory of the whole warehouse once a week.

### **Assistant General Manager**

White Castle System, Inc

September 2008 to August 2012

I basically ran the store when the GM was not there and assisted when he/she was. I was transferred around to a few different stores during my time as AGM, I worked with many diverse crews. My basic responsibilities were as follows: daily and overall inventory, handling money, ensuring good speed of service, tracking sales, understanding profit-loss statements, scheduling, job records, handling disciplinary actions, following food quality standards, responding to customer complaints, changing advertisements, price changes, and ensuring daily cleaning was getting done.

## Education

---

### **Associate in Information Technology Management**

Anoka Technical College - Ham Lake, MN

January 2017 to May 2020

### **High school or equivalent**

Fridley Senior High School - Fridley, MN
