

Jacob Griffy

Journeyman sheet metal worker seeking employment in-between union work

Hudson, WI 54016

jgriffy016_zrt@indeedemail.com

+1 651 315 0856

After working for multiple companies through my union, I have learned how to adapt to changing work environments and apply my personal skills to each place to create a good working environment and manufacture quality products by combining shop standards with my own standards. I would like to apply my skills I have learned and my best to your company to achieve a good quality product and to be a part of your company. Also, please note that because I am a union sheet metal worker I can't do sheet metal work outside of the union. My experience listed on this resume is to show the universal knowledge I have learned not specific to sheet metal. Right now I'm seeking employment in-between union work because of the construction industry slowing down.

Authorized to work in the US for any employer

Work Experience

Journeyman Sheet Metal Worker

Faircon Service Company(Union) - Saint Paul, MN

August 2021 to July 2022

At Faircon Service Company we installed ductwork, kitchen hoods plus the grease duct for the kitchen hoods, and a variety of equipment that goes with it. I had to follow blueprints, written/verbal instructions on how to install it to a specific standard or goal. after that i had figure the best way to plan and achieve a quality product and in an efficient way. For union work its common to not be a single company for very long, a lot of the time when a project/projects are done they will let you go when your services are not needed anymore.

Journeyman Sheet Metal Worker

Metropolitan Mechanical Contractors(Union) - Eden Prairie, MN

March 2021 to July 2021

At Metropolitan Mechanical Contractors(MMC) I did mostly large scale projects such as skyscrapers, hospitals, large office buildings etc. For MMC most of the ductwork was preplanned and measured ahead of time so we would install it in an efficient and quality manner according to the blueprint and any other written instructions. For union work its common to not be a single company for very long, a lot of the time when a project/projects are done they will let you go when your services are not needed anymore.

Journeyman Sheet Metal Worker

Associate Mechanical Contractors(Union) - Shakopee, MN

July 2020 to January 2021

At Associated Mechanical Contractors(AMC) I did multi-unit buildings such as senior citizen apartments, apartments, retirement homes etc. we worked off of blueprints and written directions. all the duct was field measured and cut at the jobsite. For union work its common to not be a single company for very long, a lot of the time when a project/projects are done they will let you go when your services are not needed anymore.

Education
