EMPLOYMENT HISTORY

Cold Mill Trucker & Forklift Operator

Golden Aluminum, Inc.

April, 2014 —

/ Assist Cold Mill production line by staging coils of aluminum to be run through the Cold Mill using the forklift / Remove the first layer of aluminum coil prior to insertion into the Cold Mill process / Remove finished aluminum coil from the Cold Mill at the end of the process with the forklift / Remove several outside layers of the finished aluminum coil to pull a QC sample / Band the aluminum coil and stage it at the appropriate location for the next stage of production / Remove all left over aluminum chip scrap from the Cold Mill production area using the forklift / Take the aluminum scraps to the scale, weigh and tag them with the weight and aluminum alloy / Take the scraps up to the Melt Ovens area to be re-melted down for the aluminum to be reused / Assist in swapping out the Cold Mill pressing roller assemblies. Annealer Operator / Receive coils of aluminum from the Hot Mill or the Cold Mill to be annealed(baked) / Load these coils into the annealer ovens (using the forklift) based on the customers product/practice number, delivery date and temperatures / Program the annealer oven controls for the proper ``baking" temperatures and times based on information found on the plants computer system / When the annealing/baking cycle is done, remove the aluminum coils from the annealer oven using the forklift and stage these coils in front of cooling fans at the proper department for the next stage of the coils production / Remove freshly processed coils of aluminum from the end of the Hot Mill Process with the forklift / Take coil over to the scale to be weighed / After weighing the coil, put the coil on the Hot Mill coil roller to finish the Hot Mill Process / When the Hot Mill process is fully complete, take and stage the aluminum coil using the forklift, to the next step in the production process (Cold Mill or Annealer) / Take oil and coolant samples from the Cold Mill process, and do lab tests for Viscosity, Staining and Ester - Alcohol content.
