## Summary

---

I am a journeyman ironworker with 19 years experience. I went through the apprenticeship program and I am certified in rigging, welding, OSHA 10, CPR and first aid, powered industrial truck operator and several different types of lifts.

Ironwork has not been as dependable of a job as it has in the past. I am only working about half time and I am looking at other options. This this position seemed interesting and closer to home.

## Highlights

---

- Blue print reading
- Welding
- Foreman
- Rebar
- Structural steel
- Problem solving
- Pre task planning
- Safety

## Accomplishments

---

Obtained several certifications in welding that are above and beyond standard ironworker requirements. Stay upgraded in all of my continuing education.

## Experience

---

### Ironworker

August 1999

**Local 512** — St Paul, MN

As a union ironworker, we get sent out to jobs through the hall. From the hall you get sent out to the job where you are needed. You work for the contractor that was awarded the bid on that particular job. So you end up working for many different contractors throughout the year.

## Education

---

**Ironwork**, 2005

**St Paul Tech** — St Paul, MN, US

I completed the ironworker apprenticeship through St Paul Tech. It was a three year program.
