To obtain a job in my area of qualification that could lead to a career role. I have obtain and have the qualification as a Mig welder also have experience in such area as cnc plasma, logistic, cycle count, inventory control and ware house experiences. I will like to bring such skill and knowledge that I have gain over my years to a great company that is willing and also seeking someone with my kind of knowledge and experiences.

## WORK EXPERIENCE

### **Assembler**

Greco INC - June 2014 to February 2015

When I work at Greco Inc. I built pumps that were used in much application from pumping food to pumping natural gas and waste materials. My job requires that I read blue print to build pumps, so that the right materials were being used for the various pumps that were building. Also had to test the pumps which ran on compress air to make sure it pass before it could be shipped.

### **Assembler**

Micro Control - Fridley, MN - January 2013 to December 2014

At micro control I work in the machine shop. My duties in the machine shop was welding, spot welding, break press, grinding, and deburring or parts that was used for hi power burn-in systems  
ST. Jude Medical Minnetonka

### **Material specialist**

Micro Control - September 2013 to June 2014

Was a material specialist at St. Jude medical Shipping medical parts out the warehouse make sure it was the right parts and it came from the right batch order number and make sure that it was not damage? At sjm I Also used the FedEx and the ups shipping software that sjm provided. I used the sap software that the company ran the warehouse on.

### **Material Handler**

Loram Maintenance Way - Hamel, MN - December 2012 to August 2013

When I worked at Loram I did material handling. I got the material ready for the day's work off train track repairs. I also help with the track repairs and maintenance of track from grinding the rocks to ditching and shoulder blasting cleaning.

### **Cnc Plasma torch operator**

Dmi industries - Fargo, ND - March 2011 to November 2012

My job function at dmi industries was setup of cnc plasma torch machine and uses that machine to process plates that were used to build wind turbines. Company closed that why I left.

### **welder at Cummins I**

Cummins power generation - Fridley, MN - August 2007 to March 2011

Fridley, MN

Logistic II/ Welding & sheet metal 8-2007 to 3-2011

MY duties as logistic II at Cummins were to load and unload the truck that brought in part for generators. I also pick parts and order parts using oracle program. Also I did inventory audits ever year and cycle count daily. As a welder at Cummins I was welding the skid or platform for the generator to be mounted on, or what so ever part that was needed.

### **Material Handler**

Schwing America White Bear Township - June 2005 to August 2007

At Schwing America I was a material handler. I was in charge or get the material for the next day built for the cement mixer truck and the boom truck. Had to make sure everything was put away in the right location and to keep the inventory up to date. Did the inventory and cycle count.
