

Jamie Pate

Firestone, CO 80520

jamiepate72@yahoo.com

(307) 747-8965

I am currently seeking a labor or production position. I have worked in the oil and gas field for over 24 years, and have gained good mechanical skills with various production equipment. The same problem solving and maintenance skills that is needed in other fields as well. I work very well on my own and in groups, and I believe in doing the job correct the first time with the utmost respect for safety for myself, coworkers and staff. I am a firm believer in having and displaying great communication skills for a better, and more productive work environment on and off the work site. I am more than willing to attend any classes to improve safety, and productivity, and to excel my skills to enable me to do better in all aspects of the job, this allows me to be a better asset to the company and customers. My background in the oil and gas field has prepared me to work under stressful and ever changing work conditions and environments. Due to the constant shifts and unexpected downsizing in the oil and gas field I am very much wanting to learn and excel in other fields. I am wanting to branch out and try new positions and gain more skills to better my assistance to the management and crew which will at the same time allow me to utilize and challenge my mechanical and industrial knowledge and labor ability. I am looking for a company that I can grow and learn with, that will value my skills, and provide opportunities for my growth.

Willing to relocate: Anywhere

Authorized to work in the US for any employer
