## SUMMARY

Adept at press brake and shear operations, I elevated production quality at Roadrunner Metal Fabrication by mastering precision measurement and fostering teamwork. With a knack for technical communication and a relentless drive for excellence, I ensured projects met customer specifications, enhancing operational efficiency and product quality.

## SKILLS

- Production scheduling
- Customer specifications
- Press brake operation
- Precision measurement
- Sheet metal fabrication
- Bending techniques
- Technical communication
- Work Planning and Prioritization
- Blueprints reading
- Technical understanding
- Machine and tool maintenance
- Physical stamina
- Teamwork and collaboration
- Metalworking
- Adaptability
- Self motivation
- Excellent communication
- Reliability
- Hoist and crane operation
- Multitasking capacity
- Quality assurance

## EXPERIENCE

### Press Brake Operator

Roadrunner Metal Fabrication | Denver, CO | Aug 2016-Jan 2025

- Set up and operated press brake machines to bend, form, or straighten metal according to specifications.
- Monitored stock levels of raw materials necessary for production runs.
- Developed solutions to wide range of complex technical problems to meet organizational objectives and deadlines.
- Ensured that all work areas are kept clean throughout the shift.
- Collaborated closely with other departments to ensure timely completion of projects.
- Controlled machine operations to complete precise, high-quality work.
- Ensured proper lubrication of machinery and refilled coolant tanks as needed.
- Kept parts within close tolerances of design standards to maintain optimal quality.
- Operated other equipment in support of press brake operations as required.
- Verified accuracy of finished product by comparing it against blueprints or templates.
- Assisted in loading raw materials onto the machine prior to operation.
- Performed routine maintenance tasks such as cleaning, inspecting, and lubricating parts.
- Operated hoists, cranes and other material handling equipment to lift heavy work pieces or

move loads.

- Checked all safety devices before starting the job and ensured that they were functioning properly.

### **Shear Operator**

Roadrunner Metal Fabrication | Denver, CO | Jun 2015-Aug 2016

- Performed regular maintenance on shearing machine, including lubricating, cleaning, and tightening loose parts.
- Verified accuracy of finished product by measuring with precision tools.
- Utilized hand tools such as grinders, files, hammers for fine-tuning cuts after completion of the shearing process.
- Ensured safety guidelines were followed at all times while operating machinery and working with hazardous materials.
- Followed work orders to select proper materials, make accurate cuts, and complete precise finished products.
- Provided assistance in other areas such as loading and unloading materials from trucks or forklifts when needed.
- Operated shearing machine to cut and trim sheet metal parts to specified dimensions.

### **EDUCATION AND TRAINING**

#### **High School Diploma**

Davis Applied Technology College | Kaysville, UT | Jun 2009
