(312) 543-6882

I am seeking a career change, and offer you my experience, knowledge, and service in exchange for an engaging environment with a supportive team. I bring many tangible and intangible skills and talents to the team that will be an asset to your business. These skills have been honed by 11+ years in the Hospitality and Customer Service Industries, the self driven pursuit of knowledge, as well as developing and patenting my own product while managing my Start-Up - Honey Forms LLC. I set high performance expectations for myself and aim the same caliber at attention to detail, thoroughness, and tenacity into everything I do.

Authorized to work in the US for any employer

Work Experience

Machinist

Bratek Engineering/ Manufacturing - Denver, CO

July 2021 to Present

As a manual / CNC machinist I operated CNC mills, Bridgeport, saws, and air tools to create parts to Spec.

Inventor, Machinist, Panelist/ Public Speaker, CNC Machinist

Honey Forms LLC - Denver, CO

April 2016 to Present

I founded Honey Forms LLC to pursue an invention that benefits Medical Cannabis patients. My goal is to network with researchers and seek strategic partnerships with which I can monetize my utility and design patents to generate residual income as I pursue other passions and career opportunities. I presented a Keynote at the CBD.up Expo in 2019 and spoke on a panel at the same event on Product Innovation in the cannabis industry. I have essays published on my website: www.honeyforms.com.

To develop this product, acquired and taught myself how to program and use a CNC mill during my free time away from my full time job. For 2years I worked night and day until I had a viable product and left retail to network and pursue my Start Up full-time. I am proficient in using Vectric VCarve Software, milling wood, plastics, and epoxy as well as mixing and pouring silicone. I maintained and operated the CNC as well as other power tools and hand tools to produce prototypes. I also produced a large batch of custom merchandising displays for a local company. I have Samples available upon Request.

CNC Machinist

Tensitron - Longmont, CO

January 2021 to June 2021

I managed production, performed inspection for parts, maintained the machines by cleaning/ changing inside/outside components such as way oil, coolant, chip removal, coolant reservoirs and managed tooling/stock inventory. I ran three CNC machines at at once and maintained efficiency and precision while doing so.

Floor Manager, Budtender

The Farm Co - Boulder, CO

May 2020 to December 2020

As a floor Manager at The Farm, I was responsible for overseeing compliance in daily operations and delegating tasks to keep the store clean, compliant and organized; did nightly and monthly inventory; helped revised and created management and training materials; and served guests.

Bartender

Tracks Night Club / EXDO - Denver, CO

December 2019 to March 2020

As a Bartender and Event Staff I checked IDs; made drinks; and transacted guests in a fast paced, high volume atmosphere. We were required to dress in all black dress attire or themed depending on the event.

Budtender/Receptionist

Starbuds - Louisville, CO

June 2017 to July 2019

I utilized my bartending experience and carried over the passion over into cannabis. I studied its nuances and the various products to provide exceptional customer service and my sales were reflective. I was one of the highest earning budtenders in the store grossing between 5-10k\$ in sales in a 10hr shift during peak season. I was consistently high in sales by catering to various demographics, up-selling higher-end products while being able to explain and justify the higher cost in an easily digestible presentation.

Bartender, Server, FOH Manger

Three Leaf Concepts - Boulder, CO

June 2015 to May 2017

My Experiences at numerous locations and in numerous positions honed my skills in providing exceptional customer service in a dynamic environment. I understand latent and tangible elements of operations and customer service and how these affect the over all customer experience, as well as how to successfully manage myself and others under pressure.

Education

Diploma

Coral Glades High School - Coral Springs, FL

2010
