Work Experience

Manufacturing Technician

Zimmer Biomet

September 2010 to Present

I am the manufacturing Tech lead here at Zimmer, I've been here going on 13 years. I am in the medical device industry. I inspect parts, work on parts, fix parts, and I also am in control of the cage which consists of being in charge of all our raw material in and out bound and issuing it out to the machines and to make sure our machinists have what they need to do their job. I do Custom Environmental Services for our passivation system and for all our hazardous waste used oils. I set dates for pick ups and drop offs and I am also apart of facilities and do odd jobs around the building and the machine shop. I have my DOT training and fork lift certified and I work with the mechanical Engineers on a daily. SAP, 5S. can use calipers, mic's, tape measure, and any hand tools..I am a fast learner and willing to learn new things to progress.

Education

12 th in none

Lester R Arnold High School

1991

12

Skills

- Quality Control (10+ years)
- SAP
- Quality Assurance
