### **Welder**

Hitchdoc/Trillium

-

Jackson, MN

December 2015 to July 2018

**Job Duties:** My duties as a contractor are to fabricate weldments in accordance to AWS D1.1 using mostly pulse mig of .035 and .045 wire. Mostly out of position welding of high end agriculture equipment and manhole covers for the pipeline in North Dakota. Miscellaneous tig stainless and aluminum. Usage of overhead and jib cranes is a daily task. Heavy plate weldments up to 2" are also frequent projects here. Assisting other members with welder setup and weld quality is also a frequent task to make a quality product.

### **Welder/Fabricator**

Abr/Badger Sheet Metal

2015 to 2015

**Job Duties:** My responsibilities include but are not limited to reading blueprints to make a product that was done correctly and in tolerance. Welding with GTAW and GMAW mostly on stainless steel and light gauge carbon steel, including some aluminum, piping and process piping. Other duties include rolling sheet metal drilling and tapping holes. I am forklift certified and use of overhead jib cranes was frequent. Helping crew members with needed projects and making the best product I can.

### **Welder/Fabricator**

American 3Fab

-

Green Bay, WI

2012 to 2014

**Job Duties:** My responsibilities include but are not limited to reading and/or making corrections to blueprints. Fabricating weldments in accordance to aws d1.1 weld procedures when required to meet tight tolerances. Welding using GMAW, GTAW, FCAW, and occasionally SMAW. Welding various metals including aluminum alloys, stainless steel, and carbon steel. I have welded process pipe and sanitary 3A while at A3F. I have received certifications in mig, fluxcore, metalcore, and spray. Other duties include rolling sheet metal, bending solid stock using a Hossfeld, drilling and tapping holes in a mill along with usage of a lathe and punch. Cooperating with my crew members to help them out with projects or questions they may have. Maintaining my work area and welders that are in use by me

along with equipment. Keeping an up hourly datalog of my work and sending out the best quality product that I can.

### **Service Labor**

Bay BP LLC

-

Green Bay, WI  
2003 to 2010

Job Duties: My responsibilities include but are not limited to working to establish a Convenience store and restaurant business.

This consist of establishing contracts with multiple vendors for gas and C-Store items. Ordering items on a reoccurring basis as well as growing the selections as demands require and keeping a tight belt on cost associated with out of date products. I am also in charge of account payables and payroll. I work the front desk and do everything else including as much as possible in the maintenance area. (Small business owner)
