I have been a professional at every career I have chosen throughout my life. I have an insatiable desire to create, design and improve all matters of my involvement. I spent five years in the U.S. Army, three of which as a non-commissioned officer and troop leader. After my time in the Army, I have dedicated myself to perfecting my craft as a machinist. I attended Warren Technical School to earn my certificates, and have worked in several machine shops, currently in the Aero-Space industry dealing with tight tolerances on exotic materials. My focus as a machinist is with Lathes (manual and CNC), but I have experience with many machines.

Willing to relocate: Anywhere
Authorized to work in the US for any employer
