I am a family man with two kids and a fiance. I grew up in the heart of Colorado in a small town called Buena Vista where I graduated from and started my love for welding! We relocated to Loveland Co, in 2011. I have been Welding for about 15 years. I have experience welding high pressure vessels for the oil fields. I specialize in Mig and Stick welding and have experience with cutting, grinding, forklift operating, and am able to read blueprints for any job.
