### **SUMMARY:**

Over 33 years in the heavy construction industry; refineries, minerals, mines, steam power generator, natural gas, smelters, boilers and cogens, geothermal, coal dryer, biofuel, pipelines, fabrication shop and tank battery storage. Through the years of supervision, I have directed and worked with the safety department to help educate the coworkers, "safety starts with them first", "their rights to stop work if unsafe", recognize potential hazards, buddy systems and worker participation with safety.

### **EDUCATION:**

Brainerd vocational, MN - ASE  
Colorado State JW on hold till renewal  
API 1169 taking test in August 21  
Tall grass Energy Construction Certified Welding Inspector (CCWI) ½ 1104 and ½ TG procedures

### **CONSTRUCTION MANAGEMENT: CONSTRUCTION INDUSTRY**

- Supervisor for communication and awareness
- Appointing/Interviewing Method
- Budget/Financials Management
- Management of Contracts/Vendors/bidding
- Project Administration
- Commissioning and PSSR
- Pro Microsoft
- Pro Adobe

### **PROFESSIONAL EXPERIENCE:**

#### **Tallgrass Energy, Sterling CO**

Sr Construction Coordinator/PM (10/26/2015 to 09/18/2020)

Overseeing 20 million in capital and operation construction each year. Generating budgetary construction forecast, AFE, populating management of change (MOC), EHS permitting, Right of Way, scope of work for bidding project, estimating, awarding projects, Purchase of requisition for material and services, overseeing construction weekly scheduling, completion of project, shipping and receiving, OQ verification, project inspection per company procedure and standards, welding inspection, certifying welders, PSSR and job data book. Participated with compliance and standard community, Right of Way and environmental regulation, welding integrity and Environmental hazard, red line drawings and safety and hazwoper departments. Criteria included gas, oil and NGL for pump station, compressor station, pipeline, meter run, tank batteries, master border station, liquid gatherings system, and laterals. Anomalies, tank and pipeline inspection. Assist supervisors with budgeting and budget forecasting in operation. 51 OQ's as an active SME /evaluator. Regulation training for DOT, PSSM, FERC 192, FERC 195

#### **Merit Energy, Liberal, KS**

Lead Construction Representative via Energy Inspection Services (05/14 – 10/13/2015)

- Construction manager for Merit Energy out of Liberal KS, covering SW of Kansas. Oversee contractor's build new and update old tank batteries per API 500. Scheduling, material purchasing and receiving, cost tracking, construction, build/design, quality control and start up with commissioning.

**Oxy Energy, Liberal, Ks**

Construction Inspector via Roadrunner Inspection Service (06/12 - 05/14)

*API 500 storage batteries*

- 5-10 billion in capital construction budget
- Oversee the contractor's installation for Oxy's tank battery and wellhead
- Responsible for contractors to adhere to safety guidelines and standards, following safety rules and regulations to promote a positive safety culture.
- Responsible for adhering to environmental standards and for environmental awareness. Responsible for cost control of projects reporting daily and weekly meeting
- Expected to make responsible decisions in the field for the required work to be accomplished safely and productively
- Ensure no leaks, spills or releases

**Reynolds Industrial Construction 06/11 - 06/12**

Quality Control/ Safety Manager

*Boiler systems, refineries, gas plants and compressor stations*

- Quality management overseeing fabrication for structural and pipe related to DOT, B31, 1104, ASME VIII and API procedures. Monitoring and updating Reynolds WPS and WQP for pipe and structural welders. Completing U, R and S stamp on new and existing vessels. Verify fabrication follows procedures and specification, NDE/XRAY, hydro and pneumatic testing and provide documentation per clients requirements. Monitor safety with shop and field, placement of safety documents and training for workers and Supervision hands in safer environment awareness.

**Tulsa Inspection Resources 01/10 - 06/11**

Construction Inspector

*Amine and Glycol facility*

- Directed 35-50 hands in construction installation on a natural gas Dehy and Tegg filtration (B31.3), daily monitor and document visual testing and complete all redline from contractors. Assist in startup and commissioning facility and led safety meetings with contractors. Audit contractors with construction and safety documents for turn over packages to client (QEP).

**Ardent Services 03/09 - 01/10**

I/E and Quality Control Superintendent

*Pilot stations, Coal mine, Refineries*

- Overseen the rocky mountain construction division with quality and safety documents turn over to clients (BP, Sinclair, Exxon, Shell, and Enterprise), updated and instructed supervision on revision and new codes. Visit sites monthly for audits and meetings with supervisors and workers on construction, testing and safety awareness.

**Jacobs Engineering** 07/07 - 03/09

Quality Assurance Team

*Refineries, Mines, Gathering facility, Cogens, and heavy industries*

- Assist engineering with procedures and specifications per clients, completed inspection test packages for QC on site and performed vendor surveillance. Hire and direct QC for construction site, wrote procedures, categorized critical list, monitored equipment list and delivery dates, up dated redline from construction and revision from engineers, audit transmittals, monitored progress reports and bi-weekly schedules to Project Managers.

**Moody International** 03/05 - 07/07

Construction Manager/ Inspector *Pilot station*

- Assist engineering with a bio diesel fuel facility, direct 45-60 hands and led safety meetings. Directed construction installation with contractors, reported to engineering with installation and witness testing. Weekly meetings with contractor and engineers with production and revision/redlines, reported to Project Managers weekly with schedules and safety activities. Directed safety walk downs with contractors, directed 3<sup>rd</sup> party safety instructors for worker education and monitored safety incidents cause and effect.

**Pearl Group Engineering** 04/04 - 03/05

Quality Control/ Superintendent

*API500 storage batteries*

- Assist office engineering from construction site at Marathon refinery, directed 10-25 workers with safety and report to Project Manager. Direct automation operation with operators, instructing operators with function and commissioning. Updating schedules with contractors work performance in congested work areas, documenting daily activities and turning over systems.

**Fagen Inc.** 08/02 - 04/04

I/E Quality Control and Commissioning / Superintendent

*125 mega turbine steam generator, 100 billion methanol facility*

- Directed up to 125 supervision and workers, turnkey construction on Steam Power Generators produced from F16 engines and Million gallon Ethanol facilities. Oversee weekly meetings and budgets with internal crafts with production and safety incidents, monitored weekly progress and vendor equipment delivery schedules. Assisted engineering with updates for construction revision, redline audits and document control distribution. Generated system priorities and turn over packages for startup, directed commissioning crew and weekly progress reports

**The Industrial Company** 1987 - 2002

I/E Superintendent

*Mines, Cogen, Reefers, Smelter facility*

**SPECIFIC TRAINING:**

Mechanical

- ASME sec VIII (U,R,S stamp)
- ASME 1104
- ASME B31.3
- D1.1
- API 500
- Stress relief and back out

Quality Assurance and Quality Control

- Corrosion protection, ROW and GPS
- NDT level I: RT, PT, MT, UT
- OQ certified
- Pipe integrity
- Weld and heat mapping
- Vendor surveillance
- Document control Safety

Electrical and Instrumentation

- NEC
- Instrumentation calibration
- SCADA
- Heat trace
- Power distribution
- PLC and DCS

Civil

- Air, slump and additives
- Rebar and pads
