EMPLOYMENT HISTORY

Star Precision LLC
Frederick, CO 80504

Estimator
May, 2014 thru Sep., 2017

While employed as an Estimator at Star Precision, a precision sheet metal job shop with machine shop capabilities my duties included using ProfitKey in performing material takeoffs, pricing special materials, determining processes and times required to manufacture the various items the customer is requesting pricing and delivery on.

Industrial Technologies, Inc.
Erie, CO 80516

Buyer / Estimator / Project Manager
Sep., 2013 thru May, 2014

When employed as the Project Manager / Buyer at Industrial Technologies duties included locating jobs to bid, performing material takeoffs, ordering materials, tracking change orders, revising drawings to reflect the changes to the project, coordinating fabrication and suppliers in order to assure deliveries that meet the customer's requirements.

GBC, Inc.
Lakewood, CO 80228

Estimator
Feb., 2013 thru Sep., 2013

While employed as an Estimator at GBC, Inc., a fabricator and machining job shop where my duties included using JobBoss in performing material takeoffs, pricing special materials, determining processes and times required to manufacture the various items the customer is requesting pricing and delivery on.

Kloppenber & Company
Englewood, CO 80110

Project Manager
Jan., 2011 thru Feb., 2013

Employed as a Project Manager at Kloppenberg & Company, a custom stainless steel casework fabricator where my duties included implementing E2 as the new ERP software package used as a fabrication tool, creating BOMs, estimating costs, processing orders, verifying order and delivery requirements, performing material takeoffs, ordering special materials, tracking change orders, revising drawings and pricing to reflect those changes, coordinating fabrication and suppliers to assure deliveries that meet or exceed the customer's requirements.

American Fabricators, Inc.
Brighton, CO 80601

Project Manager / Buyer
Oct., 2006 thru Jan., 2011

While employed as the Project Manager / Buyer at American Fabricators duties included locating jobs to bid, performing material takeoffs, ordering materials, tracking change orders, revising drawings to reflect the changes to the project, coordinating fabrication and suppliers in order to assure deliveries that meet the customer's requirements.

Maysteel LLC
Fremont, CA 94538

Program Manager
Aug., 2000 thru Mar., 2001

Recruited to work at Maysteel as a Program Manager by another CAD/CAM software Beta team member, along with a request from a Cisco Systems purchasing agent I'd previously worked with. Located in Wisconsin, Maysteel opened a California operation in order to do business with Cisco Systems.

EMPLOYMENT HISTORY

Spacesonic
San Carlos, CA 94070

Estimating Manager
Oct., 1998 thru Aug., 2000
Cost Estimator
Aug., 1996 thru Nov., 1996

Initially I was hired at Spacesonic as an estimator when Divaricate sold it's sheetmetal operations. My hiring at that time was more of a favor to the former Sales Manager for Divaricate than for filling a need for an estimator. I left Spacesonic in 1996 to work for Contract Metal Products and later returned to Spacesonic after the founder of the company passed away and his successor requested I return to help in the revamping of the organization. I left Spacesonic in 2000 to join the team at Maysteel LLC and to work with team members of Cisco Systems.

RSP Manufacturing
Fremont, CA 94538

Program Manager
Mar., 1998 thru Sept., 1998

Hired at RSP as a Program Manager with a primary focus on New Product Introduction projects. I worked there until contacted by Spacesonic about returning as Estimating Manager. RSP Manufacturing is no longer in operation.

Contract Metal Products
Newark, CA 94560

CAD/CAM Programmer/Estimator/IT
Nov., 1996 thru Feb., 1998

Initially hired as a CAD/CAM programmer my various skills were utilized throughout my employment. I was laid off as part of a large reduction in force.

Divaricate, Inc.
San Carlos, CA 94070

General Manager
Apr., 1996 thru Aug., 1996

My employment at Divaricate began as a CNC Programmer where the intent was to use my knowledge of advanced sheetmetal manufacturing processes to grow the company to the next level of profitability. Unfortunately the Divaricate sheetmetal operation was phased out, I will supply an explanation letter from the President of Divaricate upon request.

Berger Metal Fabrication
Santa Clara, CA 95050

CAD/CAM Programmer
Feb., 1994 thru Apr., 1996

While employed at Berger Metal I worked with customers engineering departments to help them understand the requirements of engineers in making the transition from 2D paper drawing model into a more rapid prototyping 3D CAD model. When I was presented with what appeared to be a great opportunity in a growing company I chose to accept a position at Divaricate.
