#### Objective

- A highly talented Sheet Metal Worker with immense experience in fabricating sheet metal products and equipment. After being in the sheet metal business of 25 years I have become proficient on CNC and other types of machines such as Amada, Mishatoya, Finn Power, Chicago, Dieacro and Acu Press. I have a great ability to communicate with employees and other business contacts and remain professional at all times. I am remarkable at reading blueprints and taking a project from start to fruition. I recently moved to Colorado from Chicago.

A&E Technologies  
Sheet Metal Fabricator

Golden Co  
9/2012-Current

- Determine project requirements, including scope, assembly sequences and required methods and materials according to blueprints, drawings and written or verbal instructions.
- Drill and punch holes in metal for screws, bolts and rivets.
- Inspect individual parts, assemblies and installations for conformance to specifications using equipment such as calipers and scales.
- Operator- set gauges and types of sheet metal according to product specifications.
- Set up and ran setups on press brakes, turret, lathe, grinding.
- Proto Types, one off's, Layout
- Material Handler
- Maintain equipment, making repairs and modifications when necessary.
- Operated fork lift to move material to the needed work areas.
- CNC and program

#### Experience

Aerotek  
Supervisor

2000S. Colorado Blvd. Denver CO 80222  
7/11-5/12

- Determine project requirements, including scope, assembly sequences and required methods and materials according to blueprints, drawings and written or verbal instructions.
- Lean management, scrap analysis and purchasing product.
- Inventory control, making sure inventory matched systems on a monthly basis.
- Inspect individual parts, assemblies and installations for conformance to specifications using equipment such as calipers and scales.
- Operator- set gauges and types of sheet metal according to product specifications.

- Set up and ran setups on press brakes, turret, lathe, grinding. Maintain equipment, making repairs and modifications when necessary.
- Operated fork lift to move material to the needed work areas.

Experience

KSO Metal Fab 250 Romajeau Blvd. Streamwood, IL 60107  
 Floor Supervisor 2005-2011

- Determine project requirements, including scope, assembly sequences and required methods and materials according to blueprints, drawings and written or verbal instructions.
- Drill and punch holes in metal for screws, bolts and rivets.
- Write up schedules to make sure there is coverage in all departments at all times.
- Inspect individual parts, assemblies and installations for conformance to specifications using equipment such as calipers and scales.
- Operator- set gauges and types of sheet metal according to product specifications.
- Set up and ran setups on press brakes, turret, lathe, grinding. Maintain equipment, making repairs and modifications when necessary.
- Operated fork lift to move material to the needed work areas.

Matalplast

Plant Manager No longer in business  
 2003-2005

- Put together first article reports for customer to ensure specs were met and if any changes need to make to make the product sound.
- Determine project requirements, including scope, assembly sequences and required methods and materials according to blueprints, drawings and written or verbal instructions.
- Write up schedules to make sure there is coverage in all departments at all times.
- Inspect individual parts, assemblies and installations for conformance to specifications using equipment such as calipers and scales.
- Operator- set gauges and types of sheet metal according to product specifications.
- Set up and ran setups on press brakes, turret, lathe, grinding. Maintain equipment, making repairs and modifications when necessary.

Craftsman Custom Metal

Press brake set up/prototype 3838 River Road, Schiller Park, IL 60176  
 1992-2003

- Set up - Set up press brakes for the operators.
- Ran prototype to make sure material and specs will conform to project requirements.
- In charge of Rapid Response- If a line was down I had to make sure the customer had what they needed to complete their project.

Exton Metal Products  
Press brake set up/prototype

Lively Blvd Elk Grove Village, IL 60007  
1982-1992

- Set up - Set up press brakes for the operators.
- In charge of Rapid Response- If a line was down I had to make sure the customer had what they needed to complete their project.
