Work Experience

Cylinder Filler

Airgas - Henderson, CO

May 2023 to Present

- filling high pressure cylinders (Industrial, Medical and Mixes) following compression temperature / pressure method.
- Operate and safely maintain equipment for pumping or repackaging gases into cylinders.
- Perform all required pre-fill and post-fill inspections and tests before cylinders are released.
- Ensure cylinders are adequately maintained - cylinders requiring maintenance or repair are removed from service until corrected.
- Regularly inspect and maintain pumping apparatus and associated pressure gauges and monitoring devices.
- Fill cylinders or containers to proper pressure or weight, whichever is appropriate.
- Ensure cylinder filling records are accurately maintained and that all required procedures are followed in order to comply with local, state and federal regulations.
- Assist with loading and unloading trucks and/or trailers when required.
- Assist with inventory, general housekeeping, and help customers when necessary.
