Service washer, Tephseal

October 2023 - December 2024

Once the customer's car is done with the maintenance, I would have to quickly wash, dry, vacuum, clean windows, and put tire shine and then drive the car up to the front and give the keys to the service writer it goes to for the customer to be on their way and enjoy the rest of their day. It was a very fast-paced work environment, but also slow at times, had to be very aware of surrounding when driving because it was a small area for how many cars when did a day (between 50-120 cars a day.)
