Professional Summary

Effectively prepare surfaces for welding procedures, by removing materials and setting up proper equipment. Seek to use excellent welding, cutting and fitting abilities to the best of my knowledge and experience. Reliable Sales Associate with strengths in inventory management, training and customer service. Friendly, knowledgeable and hard-working team player.

Hardworking and reliable construction professional with physical stamina and job knowledge to handle any site need. Capable of completing manual jobs and operating equipment. Ready to bring abilities to new team in long-term position.

Authorized to work in the US for any employer

Work Experience

Welder

High Country Fabrication-Casper, WY

April 2024 to May 2025

Fabricate oilfield vessels either with carbon metal or stainless steel. Reference blueprint for measurements and placement of manways, nozzles, platforms and any other additions to the vessel. Layout vessel, have QC check layout and proceed for weld out on vessel.

Welder/Fabricator

The Weld Shop-Casper, WY

April 2020 to April 2024

Layout building of skids and building, reference blueprints for any measurements, fit together the skid, allow Quality Control to check fit up and then weld out skid. Use tools required in the process off metallurgy.

Welder

Power Service

June 2019 to April 2020

- Strong ability to read and interpret engineering drawing and blueprints
- Excellent oral and written communication skills
- Maintained tools and equipment
- Identified issues and immediately troubleshooting problems
- Fabricated metal structures by using welders, cutters, shapers and measuring tools

Welder

True North Steel-Casper, WY

January 2019 to April 2019

- Combined welding techniques, knowledge of metallurgy and engineering requirements to produce quality work.

- Maximized shop organization and equipment length by efficiently cleaning floor and machinery.
- Adjusted gas flow and pressure to create and maintain desired flames.
- Applied knowledge of metallurgy, geometry and welding techniques to determine optimal welding strategies.
- Positioned and clamped workpieces together and properly assembled in jigs and fixtures.
- Set up equipment and welded parts according to welding chart specifications and type.
- Assembled structural forms such as boiler parts and pressure vessels.
- Sustained safety protocols and ensured proper, cost-effective and accurate handling of equipment and materials.
- Removed loose materials and thick scale, slag or rust to prepare material surfaces for welding.
- Scraped off excess spatter and other materials using portable grinders and arc-cutting equipment.
- Laid out, fitted and fabricated metal components.
- Adjusted weld machines to correct settings prior to weld applications for precision and waste reduction.
- Heated, formed and dressed metal parts with hand tools, torch and arc welding equipment.
- Followed all safety guidelines, including proper machine guarding and lockout and tagout procedures.

Water Transfer

Well Water Solutions-Casper, WY

October 2017 to July 2018

- Used forklifts, pumping equipment and air compressors frequently.
- Collected samples to assess water quality, including tests for pH, hardness and sediment levels.
- Documented levels of material hourly and reported back to correct personnel with data.
- Protected worker safety by monitoring team member and equipment locations prior to making changes to machinery or structures.
- Relayed communication to equipment operators and helped attached special pieces.
- Read and understood specifications, drawings and blueprints to complete accurate, high- quality work.
- Loaded and unloaded vehicles with supplies needed on job sites and kept accurate daily counts of all materials used.
- Attended all safety trainings offered by employer to improve overall knowledge of safety measures and recognize areas requiring improvement.

Sales Representative

Zumiez-Casper, WY

March 2017 to October 2017

- Secured long-term accounts, providing recommendations to promote brand effectiveness and product benefits.
- Identified and approached potential customers by generating leads, setting appointments and conducting site visits.
- Developed solutions to meet market gaps and drive company sales.
- Improved advertising initiative outreach and building engagement by executing social media and digital marketing campaigns.
- Followed up after sales to assess satisfaction and identify ongoing requirements.
- Met frequently with store managers to discuss product needs, accomplish sales goals and facilitate sales growth.
- Leveraged trends in customer industries and marketplaces to shape value-added solutions and approaches for key audiences.
- Delivered products to customers in timely manner.
- Elevated new business opportunities by implementing effective networking strategies.

Roofing Foreman

Pinnacle Roofing-Casper, WY

August 2016 to February 2017

- Oversaw effective use of all department resources to maximize efficiency and achieve production targets.
- Meticulously recorded all information for each job, including supplies, parts, equipment and employees' work hours.
- Complied with federal and company regulations to ensure that all job sites maintained high level of safety.
- Planned and delegated work for multiple crews focused on the task at hand
- Used waterproof sheet materials including modified plastics, elastomeric, and other asphaltic compositions.
- Cut roofing paper to size and nailed and stapled paper to roof in overlapping strips to form base for roofing materials.
- Successfully led key projects which resulted in desired quality and time management
- Delivered an exceptional level of service to each customer by listening to concerns and answering questions.

Education

High School Diploma

Big Piney High School-Big Piney, WY
2009
