

<p><b>PROFESSIONAL SUMMARY</b></p>	<p>I am a great candidate due to my hard working nature and ability to learn quickly. I started at night production watch and have moved up to being the day-hand with Noble Energy working on Gen 4 production and new startups. I then became a contract operator at a Noble gas plant for 4 months. I then transferred to running a route supervising 3 locations. I understand the flow of production and well optimization. I utilize all resources to ensure the job at hand gets accomplished proficiently. I am a self-starter and have a drive to succeed.</p>
<p><b>PROFESSIONAL ACHIEVEMENTS</b></p>	<p><b>CORE VALUE RECOGNITION (JANUARY 2017) - COVENANT TESTING TECHNOLOGIES</b>                  This award was received as a gratitude for my display of safety when I reported a large hay stack fire out by the location I was currently doing night pad watch at. While continuing my duties to keep the pad running I kept in contact with Noble O.C.C with updates on the fire throughout the night.</p>
<p><b>SKILLS</b></p>	<p>Spot issues and coordinate correct steps to addressing and mending issues                  Self-driven with a course of pattern to assure all necessary step are taken                  Professional communication skills                  Positive attitude, team player, Pull resources to complete a task                  Willing and able to be constantly learning to better myself in any position.                  Fork Lift certified                  First responder/First Aid/CPR certified                  Smith System driving certification</p>
<p><b>WORK HISTORY</b></p>	<p><b>OPERATOR - COVENANT TESTING TECHNOLOGIES, LLC. (GREELEY, CO)</b>                  Mar 2017 - current                  Daily operations, new startups, maintenance, on Gen 4 and Gen 3 econode locations. Contract gas plant operator, under stading the procees and flow of the plant while maintaing all pressures on the suction side to pull on the field and discharge for injection if we had to pull to much over the plants compacity. While also maintaining temps for optimum operations from the inlet system through the amine system which cleans the gas to the drier skid where the gas is dried and across the cryo skid to freeze the gas and residue building to pull out NGL product and off to sales. Production reporting, review well pressure and flow rates  <b>CODE WELDER- DFM, LLC. (FORT COLLINS, CO)</b>                  Fabrication of gas and oil measurement units, understanding</p>

	<p>welding process and procedures. Assist where needed in building the structural side of the process and installing valves and meter runs in the buildings.</p> <p><b>Hettinger-Mayo Industries (Berthoud,CO)</b> Fabricated and welded skids, tanks, and vessels for the oil and gas industry.</p> <p><b>LEED FABRICATION (GREELEY, CO)</b> Fabrication of two and three phase separators and doing all repairs for any X-ray that failed in the shop.</p>
