I spoke with Brittany in Human Resources.

Authorized to work in the US for any employer

## Work Experience

---

### **Sheet Metal Fabrication and Installation**

AND Sheet Metal / CCR - Colorado Springs, CO

December 2015 to January 2020

When I left my last job I was working in the Sheet Metal Shop. In our daily work we would make collector heads, pitch pans, scuppers, T edge and many other things. The last company I was working for had three different machines we used to run out some of our gutters and our pannels. We also bent up different styles of gutters on the 10 foot breaks. I have made many different styles of metal using the break. Anything from clip for two piece compression to valley pans or J channel C channel wall flashing, drip edge, T edge down spouts and much more. I have experience in the shop and on the roof and some experience with some of the machinery. I also have an Osha 10 card I'm not sure how long they last before they expire. Also for the most part I think I have most if not all my tools and safety harness and rope. I have my own liester for welding if necessary. I do also have a little experience with duro-last, tpo, EPDM and installing gutters. I need a little help with miters but I catch on quickly if taught. I enjoy working inside with the metal fabrication most but I'm very flexible and I'm willing to flex depending on the situation .

### **Sheet Metal Fabricator/ Installer**

## Education

---

### **Ged some college in Dental Assistant Certification, 1 1/2 business management**

PCC, Pikes Peak Community College, Down to earth dental - Cañon City, CO

January 2009 to October 2010
