EXPERIENCE

Forklift operator, Shipping and receiving specialist, Duro dyne Corp, Nov 2019 - May 2020, Longmont, CO

Met targets by shipping out freight orders for the day.

Operated heavy equipment in order to pull, pack, load, and receive materials for POs. Made sure to accurately pull and process paperwork for shipments. I was responsible for making sure the BOL and shipping documents were processed correctly and accurately. Helped train employees with less experience.

Production Technician , Vestas blades , Aug 2018 - Mar 2019, Brighton, CO

Responsible for building the Tip of the wind turbine blade. Making sure to use the correct materials and use precise measurements in order to manufacture the blade. Handling materials with over head cranes. Spotting the crane operates. Preparing the blade for curing time. Troubleshooting overhead lasers that would provide measurements inside the blade mold. Practiced 5s techniques in order to work in a safe and clean environment.

Warehouse tech, Forklift operator, warranty rep, Sales, Shipping and receiving specialist, Babolat USA, Aug 2012 - Aug 2018, Louisville, CO

I held multiple positions during the years that I worked for Babolat. Shipping and receiving freight items. Pulling packing processing customer orders for authorized dealers. Loading shipments into freight trucks. Operating forklifts in order to pull pallets for freight orders while accurately processing paperwork for world-wide shipments.

Warranty representative, responsible for processing returned, damaged, defective products for inventory control and in order to record the items in a monthly Quality report that was sent to management.

Aftersales representative, job duties included offering customer support to our authorized dealers. Communicating with account holders by phone or email and sometimes Skype calls.

Stringing machine specialist, worked as a technician for specialized racquet stringing machines. Provide sales, service, repairs, and exchanges for these machines. Invoice the account for the PO and ship the order to the correct authorized dealer in a timely manner. Work with territory sales reps in different states in order to process PO's for the equipment and accessories.

Working with different computer programs such as Excel, Outlook, Authorize. Net, and many others in order to perform my job.

Machine operator, material handler, , Advanced forming technologies , Nov 2010 - Nov 2011, Longmont, CO

Machine operator of manual and automated robotic machines. Perform parts inspection while operating automated injection molding machines. Perform spec checks on products on computer based scales. I was a material handler. Pulling correct type of materials to bring out to the production floor. Exchanging materials previously used to manufacture products and returning the material to the warehouse while accurately labeling and inputting the amount of material that was used. Production booster in charge of making sure all molding manufacturing stations were adequately supplied with any items needed in order for the production technicians to manufacture products and continuously run molding machines. Train new employees on how to operate molding machines.

QA supervisor, QC trainer, Steven Robert's original dessert , Mar 2009 - Jun 2010, Longmont, CO

Practice And enforce GMP In order to produce quality edible items. Perform GDPs while filling out paperwork. Perform quality inspections on food items to make sure they are being produced correctly while using all OSHA approved equipment. Use swabs during QC inspections to determine whether equipment was ready for production. Train quality control technicians and production technicians with GMP practices. Print labels for finished RTE items with correct manufacturing dates and expiration dates.

machine operating , Artemis rubber technology , Mar 2008 - Mar 2009, Longmont, CO

Operating molding machines. Accurately manufacturing products and making sure they are within specs. Using pallet jacks and other equipment to move final product into the warehouse.
