I work efficiently with safety being the number one topic on mind. I take pride in the quality of my work. I understand one piece flow and lean manufacturing. I can program and run a brake press. I have experience welding with a MIG system. I am physically and mentally able to do everything that the job requires. I am able to stand, bend, and twist all day with little fatigue. Long hours are not a problem and overtime is always welcomed. I learn fast and will become an asset to the company very quickly.
