**Skills:**

My skills go a long way from construction to office work. Not only do I know how to properly install pipe but I know how to properly inspect pipe with the knowledge I have gained and experiences throughout the past 3 years working closely with Inspectors, Corrosion Engineers and Project Managers. I know how to read Plans, Details, Drawings and Spec Books. I pay attention to details going on a job to the point, where I want it to be perfect so not only am I happy but the Inspector is happy as well. I am a big believer that every person on a job site has a job to do but everybody should be working together to properly complete the job with little to zero mistakes by their completion date.

**Certifications:**

- American Red Cross first aid and CPR. Completed 5/2020
- Safe land completed 12/1/2016
- Msha 5000-23 5/26/17
