National Onion Association

Greeley, CO

Re: Job: Executive Vice President

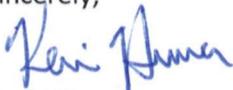

Dear Sir/Madam:

With fifteen years in manufacturing harvester and sorting belts for the vegetable, fruit, and nut industries, which included multiple dealings with **ONION GROWERS, PROCESSORS, AND ONION MACHINERY COMPANIES FROM ALL OVER THE WORLD**, I could be the person you are looking for to fill your "Executive Vice President" position.

Along with this experience, I have been a farmer also for most of my life, so I can relate to farmers; farmers who I am sure compose most of your elected officers, board of trustees, and/or chairs/members of twelve committees. Along with that, in my over thirty five years in manufacturing, I have done budgets, acted as a purchasing agent, managed staff, and have written numerous reports. I have no problem speaking in public, especially if it has anything to do with agriculture!

Please refer to my attached resume for more details about my work experience and education. As you can tell, I am pro agriculture, pro vegetable, and definitely pro onion! I would welcome the chance to show you how I could be a big asset and benefit the onion industry and The National Onion Association as your "Executive Vice President".

Sincerely,

Kevin Huwa
