## PRODUCTION OPERATOR

**720 244 7775 | Vuek1992@gmail.com**

### Objective

---

Seeking to obtain and deliver my experience in assembling and operating manufacturing machinery or use of machinery tools to meet or exceed production line expectations. Self-motivated and passionate individual with 10+ years of diverse manufacturing experience, I believe I can help with the duties of your growing organization.

### Experience

---

#### Production Technician, Lightship Energy 2025 - 2026

- Inspected parts and previous work for proper quality standards and customer specifications
- Operated and maintained production equipment to meet plant production goals
- Assisted with performing preventative maintenance on assigned equipment
- Worked alongside engineering and quality to develop strong work instructions, processes and provide insights on improvements.
- Built positive relationships across designated team by effectively collaborating, communicating, and operating with a high degree of integrity

#### Production Operator II, Solid Power 2022 - 2025

- Assisted engineers and tech integration in production process improvements
- Performed quality analysis with particle size distribution (PSD)
- Minimized contamination by 80%
- Diagnosed and repaired malfunctioning equipment
- Operated ev battery cell manufacturing in a clean room environment
- Contributed to SOPs, CPs, WI, and implemented 5S in production areas
- Managed and maintained milling equipment
- Handled hazardous materials, dry powder, chemicals/slurry, and solvents.

#### Fabrication Welder, DMF 2016 - 2022

- Cutting and grinding to specified dimensions
- Interpreting blueprint and drawings
- Proficient with power tools
- Prep material with hardware install
- Performed tig-welding on stainless steel and mild steel
- Do post-inspections and hands-on assembly after each project

- Performed leak and vacuum testing on product

**Medical Device Assembler, Wi Inc.**

**2014 - 2016**

- Assembled in-vitro diagnostic (IVD) microfluidic disposable cartridges and instruments
- Inspect prototype products for defects to comply with ISO-13485
- Tested device product to ensure function and portability in a clean room
- Safely operated manufacturing equipment to place and adjust product in clean-laser welding
- Prepared and packaged device for production quota and customer orders

**Education**

---

**Front Range Community College**

**2014 - 2015**

Completed 12 credits towards AAT

**Pueblo Community College**

**2012 - 2014**

Completed 24 credits towards AA

**Skills & abilities**

---

- Attention to detail
- Problem solving
- Communication
- Team player
- Decision making
