## SUMMARY

I'm a lathe/swiss set up guy that's a self motivated machinist with 10 years of experience. I also have 6 years of Mastercam 16 experience with turning tools, live tooling like milling, rigid tapping and many more. I grew up in a job shop so I can handle programming and setting up prototypes. Comfortable with running any types of material you throw at me. I can also run multiple machines at once and capable of holding very tight tolerance's with or with plating afterwards. I have 5 years of swiss experience. programing, setting up, and running as well.

## SKILLS

|   |                        |
|---|------------------------|
| Programming and setup swiss turning and lathe machines. | -Citizen A16, L12, C32 |
| -Mori Seiki NL2000, NLX2500, SL-150, CL-200             | -Okuma LT2000EX        |
| -Ganesh Cyclone 32cs                                    | -Haas SL-30            |
|   | -Nakamura wt-150       |
|   | -Nakamura wt-100       |

## EXPERIENCE

Machinist, Machining Express, June 2015-Current  
Longmont, CO

I'm a shift lead at machining express running the lathe and swiss department. I do all the programing, most of the setups and run the jobs. I make sure all the people run quality parts and train people on how to change tools and read customer prints. We run really tight tolerance's such as .0005 all day no problem.

Operator/setup , Longmont Machine, November 2009-June 2015  
Longmont, CO

Longmont Machine was my first machine shop I've worked at. I learned everything there. I first started off as a operator running the Brothers and Mori Seiki mills for a couple of years. I moved on into the Lathe department and loved turning the chips. I began learning how to set up Lathes and started programming them on Mastercam 16. Longmont machine was bought out from a company called Machining Express and I stayed with them ever since.

## EDUCATION AND TRAINING

High School Diploma  
Silver Creek High School, Longmont CO
