Welder/Fabricator

Starting Wage: \$14 per hour - Ending: \$16 per hour + OT

Responsibilities included: Fabricating raw materials to finished rolling goose neck and bumper style trailers, spot checked to certify all OSHA and DOT specifications were being met. Meeting or exceeding specified production quotas.

2008-2010 - Merritt Trailers 9339 Brighton Rd. Henderson, CO

Welder/Fabricator

Starting Wage: \$17 per hour - Ending: \$19 per hour + OT

Responsibilities included: Fabricating parts to meet or exceed industry standards for 48' – 53' trailers, troubleshoot and assisted in solving mechanical issues related to production equipment.

EDUCATION:

Thornton High School

Bollman Technical Education Center, Thornton, CO

Note: I have my own tools and tool boxes which include cordless impacts and other Milwaukee power tools, standard and metric impact and normal sockets along with sets of box end wrenches. I also have tools such as wire strippers, crimpers, and torch for various wiring applications. I have a 7-way pigtail test light for diagnostic work on tractor and trailers. I have a few test lights to go along with the wiring tools. I probably have around \$6,000 invested in tools thus far.
