303-210-1620

### OBJECTIVE

To obtain an entry level machining position with a company that promotes from within.

My skills include problem solving/critical thinking. I am also a fast learner and enjoy conquering tasks at work either with a team or by myself.

---

## EXPERIENCE

---

### **MACHINIST/EMJD ENGLEWOOD, CO.**

10/2014 - 3/2015

My responsibilities included prepping materials for different stages of assembly including sanding or deburring items, and attaching secondary components. With each successive part I would improve on my technique improving my efficiency and decreasing my handling time thus increasing our productivity.

### **MACHINIST/AYMAC PRECISION WINDSOR, CO.**

05/2012 - 11/2012

I operated an outside diameter mill, a lathe and a bandsaw. We made piers for foundation repairs at residential properties. Having to process large amounts of steel we invented dollies to aid with the transportation of the steel from the flat bed to the staging area allowing us to spend less time moving the metals.

---

## EDUCATION

---

### **ASSOCIATES DEGREE IN ELECTRONIC TECHNOLOGY / DEGREE PENDING**

DeVry institute of technology AZ campus  
10/1995-09/1998

---

## VOLUNTEER EXPERIENCE OR LEADERSHIP

---

Looking forward to providing support either thru

physical efforts or by brainstorming to find better ways to be productive.
