 - Hand Power Tools
 - Power Tools Experience
 - Maintaining Quality and Safety Control
 - Prioritizing Efficient and Effective Presentation of Work Ethics
-

Experience:

JULY 24, 2023 – AUGUST 14, 2023 LAKEWOOD, COLORADO

MEDICAL DEVICE ASSEMBLER, LIVANOVA

Assembly of medical products in the cardiopulmonary category of therapeutic areas that the company offers. Medical products assembled included perfusion disposables such as arterial filters (D130, D131, and micro), connectors (straight and Y), hemoconcentrators (DHF and SH 14), and perfusion tubing systems (oxygenators, cardiotomy reservoirs, venous reservoirs, tubing, connectors, filters, isolators, drip chambers, clamps, stopcocks, heat exchanger, and bubble traps). These devices all aid in cardiovascular procedures to maintain blood flow, oxygenation, restore hematocrit, and filter out debris particles in the blood. Careful consideration is done to detect imperfections of the medical assembly parts to these devices and to remove them accordingly in order to reduce any potential risk of contamination placed on the product. After assembling the listed medical device products, they were all neatly packaged and properly sealed in their specific trays for shipment. Followed all standard operating procedures such as quality and safety control in a cleanroom environment (cleanroom suit).

FEBRUARY 4, 2019 – JUNE 8, 2023 LAKEWOOD, COLORADO

MEDICAL DEVICE ASSEMBLER, TERUMO BCT

Works in the Trima area to ensure that all the components such as the Trima Channels, Cassettes, AC Filters, Loops, Vent Bags, RBC Bag, Filter Kits, Plasma Bags, Platelet Bag, BAC-T, PPC, and Inlet Coil are properly assembled while in the line. Once all the Trima parts are assembled, they are neatly placed in their appropriate tray for shipment. These parts are responsible for therapeutic apheresis where a machine aids in blood separation into its constituents. Followed all standard operating procedures such as quality and safety control in a cleanroom environment (cleanroom suit) to reduce any risk of contamination.

SEPTEMBER 2017 – MAY 2018 GOLDEN, COLORADO

MACHINE OPERATOR, COORSTEK

Made sure that products were produced on time and are of excellent quality. Determined maintenance requirements and assigned repairs to qualified employees. Kept work areas clean and neat. Calibrated carrier machines to keep them running at peak performance. Configured any human and material resources needed. Set and monitored product standards, examining samples of raw products and processing tests, to ensure the quality of all finished products. Tested products or subassemblies for functionality or quality by using a micrometer. Read and followed standard operating procedures. Collated components for assembly.

MARCH 2017 – JUNE 2017 LITTLETON, COLORADO

MACHINE OPERATOR, CPI CARD GROUP

Obtained appropriate tooling and fixtures to making credit cards. Inspected and tested components,

assemblies, and power tools. Made and revised setups on test strands previously calibrated by other staff. Disassembled, reassembled, and corrected changeover. Verified credit card quality and placed credit cards in appropriate shipping containers. Planned and paced work efficiently in order to meet daily, weekly, project or production goals. Observed all safety policies and procedures Closely inspected credit cards to ensure they were clean and free of contaminants.

Observed all safety policies and procedures Closely inspected credit cards to ensure they were clean and free of contaminants.

DECEMBER 2001 – SEPTEMBER 2007 DENVER, COLORADO

ELECTRONIC ASSEMBLY, LAMPS PLUS

Lamps Plus is a lighting retailer that provides products for home decoration. As an electronic assembler, I

played a vital role in the manufacturing side of lighting solutions, where I focused on assembling lamps and other various lighting fixtures for display or shipment. I demonstrated skills in electronic assembly and soldering by creating custom lamps from various materials and components. Besides assembling the exterior parts of a lamp, I also focused on the electronics side to help wire the lamps and other lighting products so that they are in functioning order. Specifically, I utilized wire strippers, soldering iron, solder, hacksaw, pipe cutters, and other tools to assemble and connect the lamp rod, socket, cord, plug, harp, and finial. Followed safety and quality standards to ensure proper functioning, durability, and safety measures of the lamp.

SEPTEMBER 1998 – OCTOBER 2001 ENGLEWOOD, COLORADO
PACKAGING/LABELER, MEDICAL SAFETY PRODUCTS INC.

An applied substance is added onto a needle and sets that needle with the substance into its shell. The shells containing the needles are placed into a tray. Assembled trays in chronological order while being packaged and labeled into each tray for order shipments.

Provided cleanroom assembly in the warehouse and made sure there was quality and safety control as well while in full smock.

SEPTEMBER 1996 – OCTOBER 1998 ENGLEWOOD, COLORADO
PACKAGING/LABELER, MARQUEST MEDICAL PRODUCTS INC.

Selected a particular part off of the conveyor belt according to what was required on the parts list.

Assembled medical packages by labeling, packaging, sorting and documenting. Followed all standard operating procedures such as quality and safety control in a cleanroom environment to reduce any potential contamination of the parts and packaging.

Education:

AUGUST 1980 - MAY 1984 | HIGH SCHOOL DIPLOMA | PHAN THANH GIANG | Vietnam
