Maintenance Tech with demonstrated skills and experience spanning more than 15 years. A dedicated employee, skilled in working solo and as part of a team, and familiar with all areas of maintenance and basic repair.

Business owner and operator seeking a role using a majority of existing equipment, skills and experience.

Work Experience

Handywoman

"I Can Help" Services - Minneapolis, MN

April 2009 to Present

Operated home maintenance business specializing in serving seniors and single women. Electrical installation, plumbing repair, grab bar/handrail installation and aging at home concerns. I have also subbed with other electricians, property maintenance management companies and handymen on their projects.

Maintenance Technician

Several Local Companies - Minneapolis-Saint Paul, MN

April 2009 to March 2019

Successfully completed short-term contract doing repairs and remodeling for apartment complexes managed by client of the staffing agency. Exceeded client's expectations for quality and timeline.

Maintenance Technician

Hammer Residences - Wayzata, MN

July 2004 to April 2009

Served on team conducting general maintenance of 35 group homes. Performed monthly inspections of all homes and vehicles. Completed paperwork accurately and conducted safety and maintenance checks. Responded to challenging repair and maintenance situations with unique solutions that accommodated residents needs.

I developed relationships with various vendors who could provide materials for unique applications.

Was go-to

person for electrical tasks due to knowledge and background. Responsible for one ton box truck and tools.

Driver

Transit Team - Minneapolis, MN

March 2002 to January 2004

Assisted clients with disabilities with transportation throughout the Metro area. Helped passengers to get on and off bus and navigate to destination. Worked within tight timelines to ensure passengers arrived when expected while attending NEI full time.

Low Voltage Technician

ProTech - Plymouth, MN

November 2000 to March 2001

Ran cables, installed system components and terminated panels. Trained customers in systems such as security, card reader, and cameras. Earned security clearance at Minneapolis-St. Paul Airport.

Low Voltage Technician

GSSC - Bloomington, MN

November 1998 to September 2000

Oversaw jobs from start to finish. Analyzed blueprints and layouts, installed and programmed components, and trained clients on their use. Installed multiple systems including fire, card access, security, cameras, and intercom. Responsible for company van and tools.

Education

Diploma in NEI

St. Paul - Minneapolis, MN
