COMMUNICATION

- Working within the environments of both the Military and MillerCoors I have been able to develop my communication skills to a very high level. While flying in Blackhawk Helicopters it is imperative that you understand how to be direct and straightforward while communicating with other crew members. With over 300 plus hours flying as a Crew Chief I was able to work on and refine those skills. Upon coming to MillerCoors I have been put in situations that require communicating quality issues, inconsistencies and safety situations to both my coworkers and management has become imperative. As well as proper training to ensure high quality product is going out the door in a safe and efficient manner by all those who follow me.

LEADERSHIP

- Graduated from the Non-Commissioned Officer Leadership School while serving in the Colorado Army National Guard. Was promoted to sergeant in the minimum time possible due to my leadership characteristics, and before deploying to Afghanistan, became the maintenance supervisor of over 40 soldiers responsible for maintaining helicopters. While in Afghanistan I maintained that position, and became the theater Non-Commissioned Officer in Control for hoist maintenance. I was consistently commended in my yearly reviews for my leadership abilities over my soldiers. I understand that a true leader is someone that is both admired and trusted by their peers, two things I strive for. They also have the ability to guide those around them, and make them better at their jobs both through training and being a good example.
