

Logan Stribling

Machinist - Warming Trends

loganstribling7_p7w@indeedemail.com

(505) 488-3718

Precision-minded machinist with 9 years expertise in high-tech manufacturing. Natural paradigm-breaking creative with passion for using a broad skill set to take ideas from concept to reality. Strong background in product design and development. Extremely motivated by problem solving through applied physics and mechanical principles, with a long history of delivering exceptional results both independently and cooperatively.

Work Experience

Machinist

Warming Trends - Englewood, CO

July 2018 to Present

Responsible for Operation and Maintenance of Tsugami 5-axis Swiss Lathes.

- * Setup and autonomous machine and feeder operations for high accuracy mass machining.
- * Provided necessary support to facilitate nominal 24/7 runtimes while minimizing any downtime.
- * Developed and modified tooling and programs to facilitate new product development.
- * Fabricated tooling for varied purposes, production, maintenance etc.
- * Performed preventative and troubleshooting maintenance to machines and machine feed systems as needed.
- * Managed preparation of materials and inventory for the machining department.

Machinist III

Spyderco - Golden, CO

May 2017 to July 2018

Used cutting-edge tools and processes to reliably deliver high-precision machined workpieces constituted from exotic tool

steels to exact quantity on time, with minimal waste.

- * Amada laser cutting and punch pressing equipment with live tooling.
- * Okamoto and DMG precision surface grinding.
- * Siepmann and Lucas-Daisho multi-axis precision grinding.
- * Fanuc Robocut wire EDM
- * General manual machining operations; turning, tapping, deburring, tumbling. General manual machining operations; turning, tapping, deburring, tumbling.

(505) 488-3718|loganstribling7_p7w@indeedemail.com

Shipping Specialist

FrictionLabs - Denver, CO

August 2015 to March 2017

Conducted Direct to Consumer, Wholesale and International shipping operations with >99% success rate. Conducted

various warehouse operations via receiving and loading cargo containers, organizing materials and racking. Coordinated

customer service as needed, gaining a good reputation for the business.

- * Developed standard packing and shipping processes.

- * Designed warehousing layout and procedures, maximizing throughput..

- * Supported multiple electronic inventory systems tied to multiple online marketplaces using API software.

- * Interfaced with customers to present the absolute highest standard of service.

Service Department Manager

In Light Wellness Systems - Albuquerque, NM

January 2012 to March 2015

Lead a team of technicians in the construction, maintenance and refurbishment of multiple product lines of Class-II

infrared medical devices.

- * Trained and managed a small, highly efficient team of service technicians in a fast-paced environment.

- * Took charge of operations for the entire production facility as needed and personally managed over \$500,000 of medical

electronics inventory using an inventory management system of my own programming.

- * Interacted with authorized equipment dealers and generated sales when necessary.

Service Technician

Light Emitting Designs - Albuquerque, NM

July 2010 to January 2012

Co-managed research, development and sustainment of class II medical devices in the Naturopathy industry.

- * Repaired and Refurbished Class II Infrared Photon Therapy Pads with >99% field success rate. Skills include an in-depth

understanding of electrical circuits sufficient to repair, refurbish and retrofit products as necessary.

- * Advanced SMT and through-hole soldering techniques, Integrated Circuit operation and theory, knowledge of Analogue

and Digital PWM systems and operation, Microcontroller Programming.

- * Designed, fabricated and used specialized test equipment that remains essential in current operations in addition to modifying, repairing and calibrating existing electrical test and lab equipment.

Education

B.S. in Architecture

University of New Mexico

Skills

OPERATIONS, CNC, MACHINE SET-UP, TOOLING, CIRCUITS, CALIPERS, MICROMETERS, MAINTENANCE,
SOLIDWORKS, ANSI, SYSTEMS ANALYSIS, PRODUCT DEVELOPMENT, PRINTING
