WORK EXPERIENCE

Deburring

c/axis - Hamel, MN - June 2013 to April 2016

Deburring parts using hand tools, dremel and pencil grinder ect... I also spent 6 months as the assistant to the lead in the quality department where I learned how to use many different measuring devices to ensure the parts were in print such as a caliper and micrometer, thread gage, pin gage and other devices. It was also my job to record and enter my results in the system and inform my lead of any and all findings.

Deburring

Precise Products Corporation - Minneapolis, MN - April 2006 to June 2013

deburring parts using a wide variety of tools, chamfering holes, sand blasting and tumbling were also used. Most of my work was done under a microscope while paying close attention to the print and special instructions.

EDUCATION

associates in law

Inver Hills Community College - Inver Grove Heights, MN

June 1990 to April 1993
