Authorized to work in the US for any employer

## Work Experience

---

### **Distillate Processor (CBD)**

Hibiscus Processing - Loveland, CO

March 2022 to February 2023

1. We take processed hemp and pass it thru a filtration process to separate out all of the other contaminates to produce high grade distillate. That is then sold and can be made into everything from dog treats to edible gummies.

### **Christmas light installer**

Deck the Malls - Loveland, CO

October 2021 to February 2022

I install Christmas lights on business and homes. We set up trees,lights,and decorations according to the customers specifications throughout Colorado.

### **Blendroom Lead**

Empirical Labs - Fort Collins, CO

September 2018 to October 2020

I am in charge of blending numerous ingredients to make nutraceutical products. I start with the powder and weigh it out in specified amounts according to the documentation for the pills or liquid needed to be made. Ranging from 1gram to 375 kilograms. After weighing,it is sometimes sifted by hand or mechanically and placed in a V-blender or barrel blender to be properly mixed for gel capping. I use 100s of different minerals,herbs and vitamins to make high quality product. Attention to detail and a high level of accuracy is needed to complete these tasks to meet the customers criteria. It is a physically demanding job and you must be able to use your time wisely to finish batches in a timely manner. I train new employees and oversee and direct them in the blending process according to documented procedures.

### **Stocker/unloader**

Home Depot - Loveland, CO

January 2015 to September 2015

I unloaded trucks and stocked merchandise.

### **Quality Control Inspector**

Avedon Engineering - Longmont, CO

September 1995 to July 2014

I checked the plastic injection molded parts to meet the customers documented specifications. I measured the manufactured parts using numerous instruments including calipers, height gauges, micrometers and a CMM. I also made sure the plastic parts met fit, form and function tests as well as flatness checks. It was also necessary for me to do start of run audits, hourly audits, end of run audits, SPC measurements and first article inspections during a production run. We used an AQL system to pass or reject product. I also verified the labels and packaging of the parts.

Another duty I held was a material handler. I weighed out the proper amount of plastic material needed to run a specified amount of parts. Including colorant and foam percentages.

While at Avedon Engineering I was also able to run an injection molding machine, where I trimmed, clipped, cleaned and assembled parts according to the documentation.

I worked in shipping and receiving, did inventory control, assembled final product and consistently trained new employees

## Education

---

### **High School Diploma**

Thompson Valley High School - Loveland, CO

1991 to 1994

## Skills

---

- Picker/Packer (Less than 1 year)
