Warehouse (August 2013 - November 2013)

I had different temporary jobs with this company.

Priority Plastics- I worked at a plastic molding injection machine. The machine made plastic containers. The containers came down a conveyor belt. I would grab container and use a machine that would cut off the top portion of the container.

Probuild Company - The company made doors. I helped a worker lift doors on a machine. The worker was injured and needed my help to lift door.

Future Foam- I used a machine to cut foam for furniture.

Forward Air- I unloaded trailers of packages onto a conveyor belt.

Laborer (May 2013 - June 2013)

I helped set up stages at the DU campus for graduation ceremonies. I also helped convert the stage area to the DU ice arena.

Work Experience

All Automotive (July 2012 - April 2013)

I started out at this job working on the weekends. My brother Tony would train me to be a painter's helper. He painted cars and I learned how to prepare them to be painted. I would prime cars let them dry usually over night. The next day I would sand them three different ways. Make sure with my brother that the job was satisfactory before moving on to the next car. This company would have their employees pick up cars at Enterprise rental close to Dia. This was the main contract. This company also picked up a few cars from the Denver auto auction.

Work Experience

Gloprofessional (July 2005 - July 2012)

I started and ended this job as a order picker. Each morning I would receive orders from my supervisor. This warehouse job was a makeup distribution center. There was a call center that had employees take customer orders for makeup. My supervisor would print out the orders from a computer. After I picked the order a verifier would double check the order. If the order was correct the verifier would give the order to a packer.

Work Experience

Mastercraft Cabinets (2002 - 2003)

I was a driver's helper. Each morning the driver I worked with would get the cabinets from a staging area that other employees put the cabinets. I loaded the cabinets into the delivery truck. After the loading the driver and I would deliver them to customers.

Work Experience

Painter's Supply (1997 - 2001)

I started out as a automotive paint mixer. I would also stock and pick paint supply orders for delivery warehouse. After about four years I was promoted to delivery manager. As a manager I was in charge of delivery operations .

Work Experience

American Precision Plastics (1993 - 1997)

I packed plastic utensils out of a plastic moulding machine. The utensils were used for hospitals around the country. I would inspect the utensils to make sure they were clean. Then I would pack items and place them in a box. I placed the box on a pallet

Education

Indian Springs High School (August 1988 - June 1989)

I finished all courses to graduate with a high school diploma.
