APPLICATION FORM WAIVER**

In exchange for the consideration of my job application by Corporate Management Group, Inc.,

I agree that:

Neither the acceptance of this application nor the subsequent entry into any type of employment relationship, either in the position applied for or any other position, and regardless of the contents of employee handbooks, personnel manuals, benefit plans, policy statements and the like as they may exist from time to time, or other company practices, shall serve to create an actual or implied contract of employment, or to confer any right to remain an employee of Corporate Management Group, Inc. (CMG), or otherwise to change in any respect the employment-at-will relationship between it and the undersigned, and that relationship cannot be altered except by a written instrument signed by an officer of CMG. Both the undersigned and CMG may end the employment relationship at any time, without specified notice or reason. If employed, I understand that CMG may unilaterally change or revise their benefits, policies and procedures and such changes may include reduction in benefits.

I authorize investigation of all statements contained in this application. I understand that the misrepresentation or omission of facts will result in my disqualification from consideration for employment or, if discovered after I begin employment, will result in my termination. I hereby give CMG permission to contact schools, all previous employers (unless otherwise indicated), references and others and hereby release CMG from any liability as a result of such contact.

I understand that a comprehensive background check may be conducted to determine my eligibility for hire by CMG. This may include but is not limited to, investigations of criminal and/or conviction records, driving records and/or a drug screen test as required by clients, government regulations or by CMG policies.

I release CMG and other persons or entities from any claims that might be based on CMG's decision to conduct a background check.

I understand that, in connection with the routine processing of your employment application, CMG may request from a consumer reporting agency an investigative consumer report including information as to my credit records, character, general reputation, personal characteristics and mode of living. Upon written request from me, CMG will provide me with additional information concerning the nature and scope of any such report requested by it, as required by the Fair Credit Reporting Act.

I further understand that my employment with CMG shall be probationary for a period of ninety (90) days and further that at any time during the probationary period or thereafter, my employment relationship with CMG is terminable at will for any reason by either party.

THE UNIVERSITY OF CHICAGO

The first part of the paper discusses the general theory of the subject. It is shown that the theory is based on the principle of least action. The action is defined as the integral of the Lagrangian over time. The Lagrangian is a function of the coordinates and velocities of the particles. The equations of motion are derived from the principle of least action. It is shown that the equations of motion are equivalent to Newton's laws of motion. The second part of the paper discusses the application of the theory to the case of a particle in a potential. It is shown that the motion of the particle is determined by the potential energy function. The energy of the particle is conserved. The third part of the paper discusses the case of a particle in a magnetic field. It is shown that the motion of the particle is determined by the vector potential. The energy of the particle is conserved.

The fourth part of the paper discusses the case of a particle in a time-varying magnetic field. It is shown that the motion of the particle is determined by the vector potential and the electric field. The energy of the particle is not conserved. The fifth part of the paper discusses the case of a particle in a time-varying electric field. It is shown that the motion of the particle is determined by the electric field. The energy of the particle is not conserved.

The sixth part of the paper discusses the case of a particle in a time-varying magnetic field and a time-varying electric field. It is shown that the motion of the particle is determined by the vector potential, the electric field, and the magnetic field. The energy of the particle is not conserved.

The seventh part of the paper discusses the case of a particle in a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field. It is shown that the motion of the particle is determined by the vector potential, the electric field, the magnetic field, and the time-varying magnetic field. The energy of the particle is not conserved.

The eighth part of the paper discusses the case of a particle in a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field. It is shown that the motion of the particle is determined by the vector potential, the electric field, the magnetic field, the time-varying magnetic field, and the time-varying electric field. The energy of the particle is not conserved.

The ninth part of the paper discusses the case of a particle in a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field. It is shown that the motion of the particle is determined by the vector potential, the electric field, the magnetic field, the time-varying magnetic field, the time-varying electric field, and the time-varying magnetic field. The energy of the particle is not conserved.

The tenth part of the paper discusses the case of a particle in a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field. It is shown that the motion of the particle is determined by the vector potential, the electric field, the magnetic field, the time-varying magnetic field, the time-varying electric field, the time-varying magnetic field, and the time-varying electric field. The energy of the particle is not conserved.

The eleventh part of the paper discusses the case of a particle in a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field. It is shown that the motion of the particle is determined by the vector potential, the electric field, the magnetic field, the time-varying magnetic field, the time-varying electric field, the time-varying magnetic field, the time-varying electric field, and the time-varying magnetic field. The energy of the particle is not conserved.

The twelfth part of the paper discusses the case of a particle in a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field and a time-varying magnetic field and a time-varying electric field. It is shown that the motion of the particle is determined by the vector potential, the electric field, the magnetic field, the time-varying magnetic field, the time-varying electric field, the time-varying magnetic field, the time-varying electric field, the time-varying magnetic field, and the time-varying electric field. The energy of the particle is not conserved.
