## Profile

Extensive knowledge of materials coupled with applications and a solid history of success. Proven ability to deliver deadlines. Strong analytical and planning skills, combined with a high level of experience and training to work with many types of personalities.

My experience in the work force enables me to better understand the materials that are being utilized for applications and therefore be able to execute a more prompt solution, or offer ideas that may aide in the finding of a solution.

My office experience and level of education in MS outlook, word and excel would be a profound asset to the company as Project Engineer. I work well under pressure, and have high expectations of myself to complete each assigned task with the utmost of professionalism and time sensitivity needed for the success in this position.

Highly proficient in the Spanish language; speak, read, write, and translate to coordinate the efforts of many to meet organizational goals. Productive and efficient work habits without supervision. Self-motivator with high energy.
