Authorized to work in the US for any employer

Work Experience

Chemical Tester (Back-up)

Millipore Sigma - St. Louis, MO

January 2017 to July 2020

- First, You need to take some product from the trailer to start the testing procedure. Then...
- Follow the procedures on how to do your testing.
- To test the chemical , gather and prepare the tools you need for the testing for your product.
- Before you start loading to fill up the tank, write it down your starting count (it means how much left inside of the tank before you add up to refill the tank.) Then after, it's fully loaded then wrote it down your end count. So you know how much you loaded on those tank
- Then when the trailer starts loading the tank, you must stay until it's fully loaded.
- Always double check the weight and your specific gravity before to proceed on paperwork to finalize your target evaluation to make sure it will pass.
