**June 12 2015 – 10/2017**

JCM ENGINEERING CORP. 2690 E.CEDAR STREET, ONTARIO CA. IN PROCESS  
INSPECTION / CALIBRATION June 12 2015 (Customers; Sikorsky, Raytheon, Pratt & Whitney, Lockheed  
Martin (JSF), bombardier.) In process inspector, Final inspector Lockheed Martin F35 Lightning contract.

Verify shop traveler sequences, deburr inspection, visual inspection, thread specification, Thread depth,  
Dimensional thickness, Finish specification and Verify Outside processes to purchase order

etching, penetrant inspection, verify omitted finishes, electrical bond, Conductivity, primer, top coat, fuel  
coating, Dimensional inspection, visual, assembly and F.O.D., Verify certs to customer requirements and P.O., Accept and or  
reject

II (FAI, Delta FAI), create form 1, 2, and 3 upon completion of CMM Report and outside processing,  
prior to source inspection

Verify all sequences to stamped travels, prepare cert. package to customer specification, meet with  
customer inspectors presenting finished product.

**Professional Plastics 09/14 to 2/15 Quality Inspector / Safety Coordinator Duties: Inspection to include,  
First Article, in process, Final inspection Inspect or measure moderate complex machined parts, material  
assemblies to determine precise conformance to drawing specification.**

**Check Job traveler for correct sequence of job step. Red line revisions to eliminate future rejections or  
steps missed. Make sure print dimensions and Rev # match the geometry of the part produced or  
program. Use of (OMS) dashboard and Syspro system. Visual Inspection on all Fabrication parts for  
surface discrepancies as in warp, burns, scratches, Safety: enforce safety policy and regulations,  
monthly safety meeting, visual inspection of warehouse,**

**Fire extinguisher, report near miss situations, accident reports, and investigation reports.**

**Keep all First Aid and PPE supplies on hand. Forklift trainer / evaluator crown. Lift,  
sit-down.**

**Amesbury Reliable Resources 03/12 to 08//14 Engineer Assistant / Quality Technician Blueprint  
revisions.100% calibration program. Create technical drawings of part for the quoting process using  
AutoCAD or MasterCam X5 Create technical drawing for existing Amesbury parts. Create flow charts for  
operating procedures. Create electronic detailed work instructions and/or flow charts for processes  
perform first article, in process and final inspection as a preventive action Perform dimensional, visual  
and document inspections of production to customer specification, Training: have completed 143 hrs. Of  
basic MasterCam X5, 40 hr. class of fundamental of inspection, 40 hr. class Introduction to measurement  
and calibration, Calypso CMM.**

**Education: NTMA Training Centers of Southern California - Ontario, California 07/2011- Completion:  
February 2012, 4.0 GPA and Perfect Attendance Awards Recipient Appointed "Mentor" For the NTMA  
Mentorship Program Certified Machining Level I Measurement, Materials, and Safety for the National  
Institute for Metalworking**
