Progress Note

Referred by: Dr. Badroos

Patient comes in today with a hearing aid in his right ear. He does not speak English. No interpreter is with him. He is scheduled for a corporate audiogram. I cannot tell from Dr. Badroos's note what exactly he is being referred for.

I was able to get him to perform the OSHA screening hearing test with good reliability. Results indicate a severe to profound hearing loss is present in the right ear and a profound hearing loss is present in the left ear.

If further testing or information is desired on the patient he will need to return with an interpreter.

Jean Falkavage Au.D.
