Experience

Wood Worker & Receiving Clerk

Ave Hill Air Force

September, 2013 — September, 2017 (4 years)

AECOM/URS Corp 5857 F. Ave Hill Air Force Base UT In all three of these positions we were responsible for the material coming through the door. As a packer I would look at all the stock numbers and verify I had the right material. I would pack the material into a SPI and input the correct numbers into the computer and ship the material off to the right location. I did Pretty much the same thing as a receiving clerk. As a wood worker I built the SPIs for the aircraft parts.

Proctor

February, 2013 — August, 2013 (6 months)

My Main Duty was to load and unload material. I was responsible to go to the office and get the order and then I would either unload the trailer and take all the material to the right location. If I was loading I would get the order and load the material for transport to the customer.

Education

Columbine High School

Higher School Certificate, May, 1993
