## Summary

CNC Machinist with over seven years of CNC setup and operating experience, including over five years as a quality inspector and shift leader. My goal is to use my leadership, aptitude, and experience to become a CNC machining professional.

## Core Competencies and Achievements

- Familiarity with M and G codes
- Fanuc and Herco controls
- Job Shop experience
- Mathematical aptitude
- Team projects and effective coordination between work centers & shifts
- Ability to prioritize and multi-task on projects and machines
- Time management skills to ensure timely project completion
- OPX White Belt Certification to improve departmental efficiency

## Experience

### Hanson Machine Wheat Ridge, CO

February 2008 to Present

#### CNC Set-Up/Operator

- Responsible for set-up, operations, and inspections of finished parts.
- Act as liaison between customers and outside operations.
- Calculating and setting controls to regulate machining factors, including part speed, feed, and coolant flow.
- Machining parts of various sizes to tolerance of  $\pm .0002$  or less.
- Making appropriate offset corrections for first article part to bring dimensions in.

### Coors Tek Golden, CO

February 2001 to February 2007

#### Swing Shift Lead

- Effectively managed groups of employees.
- Oversaw employees to ensure speed and quality of tasks was achieved.
- Performed daily quality control verifications.

#### Machinist

- Machined custom pieces for Stryker tank project when kits were short.
- Operated Matsuura and Hurco machines.

#### Quality Inspector

- Inspected and built ceramic armor assemblies for Stryker tank project.
- Implemented a new production process for inspections, resulting in improved quality and reduced production times.

## Education

High School Diploma

Green Mountain High School, Lakewood, CO
